Total			424,310	935,438	4,835	18,303

**Notes**

<sup>1</sup> These records were listed under hazardous waste generator number NYD980592984 for BMS at Burnet and Clark, Syracuse, NY (FOIL247206 at FOIL247206). The main BMS address has addresses on Burnet Avenue, but the location of the Clark cross street is unspecified and could not be located by TIG. However no other BMS facility is known to exist at a separate location on Burnet Ave and therefore the associated waste records are assumed to be part of the BMS Site.

<sup>2</sup> The unit for this record is unspecified, however it is assumed to be kg to match the rest of the B007 records and to contribute to the listed total amount all B007 waste.

<sup>3</sup> These records match waste manifests from the Fulton Site closure report for removal of PCB-contaminated soils in 1996 (Knauf Shaw Bristol Myers Exhibit H, 380–473).
